

Expansion of the Engineering Activities

CYME INTERNATIONAL has been recognized, since its inception in 1986 as a world leader in developing state of the art electrical power system analysis software.

In order to help its customers in dealing with increasing demands for specialized engineering studies and helps to fill a vacuum created by shrinking expertise in these areas **CYME** has, recently, been embarking on expanding its activities in the Engineering Consulting and Technology Training areas to complement its traditional Software activities.

CYME's expansion in these areas represents natural evolution of its scope of activities as it follows the request of several of its current customers in search of a complete solution for new and emerging system problems.

OBJECTIVES

- To provide its customers with a complete solution for Software, Engineering Studies and Technical Training.
- To offer a comprehensive menu of consulting services and engineering courses, for a host of problems.
- To provide opportunities for an integrated approach to supplying software, conducting studies and providing training resulting in better solutions and improved efficiency.
- To identify new and emerging problems in the electricity industry and develop innovative solutions for these problems.

ACTIONS SPEAK LOUDER THAN WORDS

CYME has been investing in different power system analysis areas by hiring highly skilled, and experienced experts to handle the different needs of our customers in solving complex (non-routine) system problems.

A program of Technical Engineering Courses is prepared in cooperation with world-renowned experts in different fields. The program will be announced shortly and the first courses are scheduled for early 2005.

Our newly appointed Chief Engineer, Dr. Atef Morched, heads the Consulting and Training activities. Dr. Morched has extensive experience with Power System Analysis studies acquired through his long service with Ontario Hydro. He contributed to the advancement of the state of the art in Power System Analysis in both Transmission and Distribution areas and he is a Fellow of the IEEE.

Attached please find further information on **CYME's** activities in the areas of Software, Consulting and Training. We hope that we can be of help in dealing with your needs in any, or all, of these areas.

Please do not hesitate to contact us for any clarification you may need about our services. At your request, **CYME** is always willing to meet with you, and your staff, to discuss your specific needs and respond to any queries you may have.

Best Regards,

A handwritten signature in blue ink, appearing to read "Marc Coursol". The signature is stylized with a large, sweeping initial 'M' and a long, horizontal stroke extending to the right.
